PROFESSIONAL SUMMARY

B.Tech Computer Science Engineering (Data Science) graduate of 2026 with a CGPA of 8.61, looking for an Associate Software Developer role. I have built and shipped backend services using Python, FastAPI and SQL, and I am comfortable with Git, Docker and the full software development cycle, from requirements to testing and deployment. Through two internships and my own projects I have learned to write clean, reusable code, work from a clear problem statement, and pick up new tools quickly, including the AI tools now used in everyday development. Based in Kolkata and available for a face-to-face interview.

TECHNICAL SKILLS

Programming: Python, SQL (PostgreSQL), Object-Oriented Programming

Core Concepts: Data Structures & Algorithms, DBMS, Problem Solving, SDLC, Debugging

Backend & Tools: FastAPI, REST APIs, Kafka, Docker, Git, GitHub, MLflow, DVC

AI Tools & Technologies: Generative AI (ongoing training), Machine Learning, Scikit-learn, Faiss, Tesseract OCR

Data & Visualization: NumPy, Pandas, Power BI, Matplotlib, Advanced MS Excel, Streamlit

EXPERIENCE

Machine Learning Operations (MLOps) Intern | AI Labs

June 2025 – July 2025

Project: Product Recommendation System with Real-Time Inference

- Built the recommendation logic using collaborative filtering and used Faiss for quick similarity search to return the top-K products for each user.
- Developed real-time inference APIs with FastAPI and Kafka so recommendation requests could be handled as a live stream.
- Containerized the application with Docker and tracked experiments and data versions with MLflow and DVC, which kept results reproducible.

Machine Learning Intern | WEBEL

June 2024 – August 2024

Project: Identifying Top Gainers and Losers in the Stock Market

- Collected and cleaned BSE and NSE market data, then ran exploratory analysis to find patterns and technical indicators.
- Built a Decision Tree model that classifies stocks as gainers or losers across daily, weekly and monthly periods.
- Evaluated model performance and documented the method and findings for the project review.

PROJECTS

Language Detection and Translation System

Python, FastAPI, Streamlit, Scikit-learn, Tesseract OCR

- Designed an end-to-end application that detects language from typed text, images and live webcam input, and translates it into a chosen language using OCR.
- Followed SDLC practices throughout, from planning and development to testing and documentation.

Customer Shopping Behavior Analysis

Python, SQL, Power BI

- Wrote SQL queries and Python analysis to uncover purchasing patterns, sales trends and growth opportunities.
- Created an interactive Power BI dashboard of key KPIs to help with data-driven decisions.

EDUCATION

The Neotia University | B.Tech, Computer Science Engineering (Data Science)

2022 – 2026

CGPA: 8.61

Mundamari Ushananda Vidyapith | Class XII, WBCHSE

2020 – 2022

Percentage: 85.4%

CERTIFICATIONS & LANGUAGES

- Advanced Data Analytics with Gen AI** — Anudip Foundation (August 2026 – Ongoing)
- Languages:** English, Bengali, Hindi
